DISTRICT 2 PUBLIC HEALTH EXCEEDS 100,000 COVID-19 DOSES ADMINISTERED

GAINESVILLE – On Saturday, March 14, District 2 Public Health reached a milestone of **100,567 doses of Covid-19 vaccine administered**. Supply of the vaccine was very limited in December and early January. As supply of the vaccine improved, the 13-county health departments have given an average of over 11,000 per week for the past eight-week period.

“We have a committed group of public health employees who have persevered through Covid-19 testing and vaccination while continuing to deliver services to our communities. With the vaccination effort, we expanded our full-and-part-time workforce, partnered with nursing programs in our area, and deployed our volunteer base to make this possible,” said Dr. Zach Taylor, District Health Director. “Having long-term relationships with our educational institutions, a volunteer organization in place, and partners in other agencies and organizations makes this achievement a shared community effort.”

For the current vaccine eligibility requirements, visit <https://dph.georgia.gov/>
To make an appointment for the vaccine, go to www.phdistrict2.org or call 1-888-426-5073, or statewide <https://dph.georgia.gov/covid-vaccine>
