EPI SUMMARY: Data source Georgia DPH and SendSS. Cases include all confirmed and probable cases. Population data source Oasis, 2019. Time frame as of 11/06/2020 to 11/25/2021. Vaccines introduced 12/19/2020 – decline noted in cases after vaccine implementation. Vaccine data includes number of vaccines administered in each county in District 2 and vaccines administered per 100,000 (of the total county population). Vaccine data also shows number of one dose received and percentage of residents as well as 2 doses received, and percentage of residents vaccinated.

\*Graph above shows weekly changes in COVID cases. The case rate reported in the graph is approximately half of the 14-day case rate.

\*Vaccine graph shows percentage of individuals vaccinated by age group.

Date: November 29, 2021

## Georgia Flu Surveillance Update: Week 45 (Ending November 20, 2021)

As of week 46, Georgia flu activity is moderate= 7, on the scale of 1-13. Activity levels are based on the percent of outpatient visits in Georgia due to Influenza-like illness during this timeframe.

For the corresponding week, the percentage of outpatient visits for Influenza-like Illness was 4.0%, the number of influenza-associated death was 1; the number of Metro Area Influenza Hospitalizations was 9, and 1 reported Influenza Outbreak for the specified period.

#### Getting the flu shot is the best thing you can do to protect yourself and others.

District 2 health departments have flu vaccines available. Please contact your local health department for information on how to get your Flu vaccine at <a href="http://phdistrict2.org/?page\_id=597">http://phdistrict2.org/?page\_id=597</a>.
