# More Information / Resources

## What you need to know

- Covid-19 is a new virus. There is no vaccine approved for Covid-19 for now. Several pharmaceutical companies are conducting clinical trials on the vaccine they have developed
- Anyone can have mild to severe symptoms
- Older adults and people who have severe underlying health conditions like heart or lung disease or diabetes seem to be at higher risk for serious complications from Covid-19 illness

**People with Covid-19 have reported a wide range of symptoms. Symptoms may appear 2-14 days after exposure to the virus. People with Covid-19 may experience:**

- Fever or chills
- Cough
- Shortness of breath or difficulty breathing
- Fatigue
- Muscle or body aches
- Headache
- Loss of taste or smell
- Sore throat
- Congestion or runny nose
- Nausea or vomiting
- Diarrhea

This list does not include all possible symptoms. Visit [www.cdc.gov/coronavirus](https://www.cdc.gov/coronavirus) for more information.

## How the virus spreads

- Spreads mainly from person-to-person
- Close contact – within 6 feet of each other
- Through respiratory droplets when people cough, sneeze or talks
- Droplets can suspend in air and people breathe them in through mouth or nose
- Some studies show people without symptoms can spread the disease

## Actions to limit the spread of illness:

- Wash your hands often with soap and water for at least 20 seconds
- If soap and water are not available, use hand sanitizer that contains at least 60% alcohol
- Avoid touching your eyes, nose, and mouth
- Avoid close contact with people who are sick
- Keep at least 6 feet of distance between you and others
- Wear a face covering
- Clean and disinfect high-contact surfaces in your home and workplace daily
- Monitor your daily health for symptoms and take your temperature regularly
- Get your flu shot
- Stay home when you are sick

Visit [www.cdc.gov](https://www.cdc.gov) for more information
