

DISTRICT 2 PUBLIC HEALTH PUBLIC HEALTH NURSE PROTOCOLS Travel Clinic 2023

The following protocols are approved for use in the Travel Clinic within District 2 Public Health. My signature below indicates that I have been adequately trained and prepared to perform the delegated medical acts. My training is documented on the clinical skills checklist/training record in my personnel/training file. I have read and understand the Nurse Protocol Law and Rules and Regulations. I understand that the protocols are to be followed exactly as written and are not to be altered. Only the Health Director or his/her designee has the authority to modify or cancel the protocol in the case of a specific patient. When the protocol is modified by the Health Director or his/her designee for a specific patient, the modification applies only to that patient and cannot be applied to others. These protocols are to be reviewed and approved no less than yearly by the District Health Director.

Zachary Taylor, MD
District Health Director
