August 15, 2025

Recently, a skunk in the area of Riverbend Road and N. Broad River Road tested positive for rabies. The rabies virus does exist in Stephens County wildlife and can be transmitted to domestic animals and humans. Rabies in humans is essentially 100% fatal if not treated within a certain time prior to the onset of symptoms. If you know of any person or domestic animal that had any contact with this skunk or had the potential to contact it, please call Shad Slocum at the Stephens County Environmental Health Office immediately at (706)-282-4507 Ext. 121.

The following are symptoms of rabies that you should watch for in any domestic animal:

- Animal stops eating or drinking
- Animal becomes unusually vicious towards owners or others
- Animal walks with a sluggish gait or even sideways
- Animal constantly slobbers from the mouth
- Animal displays strange or unexplainable behavior

If you suspect that YOU or YOUR ANIMAL(S) have been in contact with this or any rabid animal, or you notice your pet or domestic animal displaying any symptom of rabies, avoid contact with the animal and confine it, then call Shad Slocum at the Stephens County Environmental Health Office at (706)-282-4507 Ext. 121 or the Stephens County Marshals Office at 706-886-9491 Ext. 9307. If you have had contact with any rabid or suspected rabid animal, please contact your physician immediately to discuss whether treatment is necessary.

Sincerely,

Shad Slocum  
Environmental Health Manager  
Stephens County
